

# RACK 'N' ROLL

Patent Pending 2019203375

- ERGONOMIC
- HANDS-FREE
- PATENTED

*RACK'n'ROLL makes roller change out simpler, safer & quicker.*

The Rack'n'Roll is a portable rack designed to be mounted on standard hand rail panels in which idler rolls can be mounted in readiness for roll change out. Utilising the rack'n'roll for roller change out offers a hands-free procedure which is simpler, safer and quicker.

[Positioning Rack'n'Roll](#)

[Demonstration roller placement](#)

H & B Mining's patented roller removal tool is used to lift the roller from the rack and into the lowered frame of the EMRI. The roller removal tool guarantees that the slot in the roller shaft remains vertical allowing for the roll to be dropped into place between the EMRI roll support plates.
