

EMMTT for Conveyor Transfers

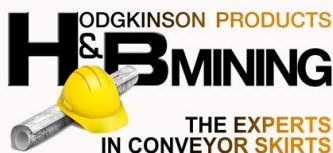

EASY MAINTENANCE MODEL TRAINING TOOL

Choose which H & B Easy Maintenance conveyor products to incorporate:

- [EMRI: Easy Maintenance Retractable Idler](#)
- [Hinged Dust Covers](#)
- [Speilbar False Deck for Chute Maintenance](#)
- [Post-less Guard \(HDPE option\)](#)
- [EMS Skirts](#)
- [Segmented Skirts](#)
- [Ultraseal Skirt](#)
- [Poly Eco-light Liners](#)

There are 12 great reasons to have the EMMTT on your mine site. Train your personnel on-site to oversee or perform the following tasks:

- Idler roller maintenance
- Idler roller change-out
- Return idler roller maintenance
- Return idler roller change-out
- Resolve blocked chute problems
- Belt change-out
- Skirt liner adjustment
- Skirt liner replacement
- Skirt rubber adjustment
- Guard removal and re-install cover
- Access to carry belt via hinged dust cover
- Chute liner maintenance whilst belt is operational

The EMMTT (Easy Maintenance Model Training Tool) assists site personnel to better understand how H & B's easy maintenance conveyor products operate; and how they can be maintained to make transfer points safer and more productive.

H & B staff can provide a demonstration when the EMTT is ordered. The location of the EMMTT on-site enables previously trained maintenance staff to provide on-site demonstration to other maintenance personnel.

Maintenance staff will be better trained and empowered to perform maintenance tasks with confidence and regularity.

Take a look at a video of an EMMTT [here](#).
